

## Stock Situation

### Description

The Stock Situation plugin provides a hub from which users can view inventory levels and availability across the business.

### Functionality

A new tab has been added to the Product screen that shows a summary of the stock situation by site. The first row sums the total situation of all sites.

From the action button it is possible to drill into a number of enquiries, see below, that provide more detail.

The screenshot shows the Mysoft Product screen with a 'Product' tab selected. A table displays stock data across various sites. The table has the following columns: Site, Short title, Total internal stock, Total allocated, Avail to Promise, Aw P/Away, On reorder, Detail Alloc, and Global Allocate. The first row is a summary for 'Total' across all sites. Subsequent rows list specific sites and their stock details.

Site	Short title	Total internal stock	Total allocated	Avail to Promise	Aw P/Away	On reorder	Detail Alloc	Global Allocate
***	Total	23414		22950		5824		
A0012	Industria	270		270				
AU012	AU Bikes	45		45				
DE012	DEFA	405		405				
ES012	ES BicliJug	3710		3710		5500		
FR012	Fabtech	7996		7876		324		
GB011	GB Comp							
GB012	GB Bike	8488		8144				
NA012	NA BikeToy							
NZ012	NZ Bikes							
PT032	ManIndus							
ZA012	ZA Bikes	2500		2500
